

Customers Say it Best

Premier Machine & Gear's new NILES ZE 800 Gear Profile Grinder increases our capability, streamlining our gear manufacturing by using high feed-rate grinding, on-board measurement, and full contact grinding—often reducing or eliminating time consuming roughing and pre-finishing operations. With NILES training, and support from Colorado and Germany, our fully operational machine has had an immediate impact to our production.

The ZE 800 not only multiplies our capacity and versatility, it also supports our plans to improve services for current customers, as well as enter new markets such as renewable energy. It enhances PMG's growth as we continue to gain market share in the medium-sized engineering sector.

We are very happy with the purchase of our NILES ZE 800 grinding machine and look forward to continuing our relationship with the KAPP-NILES team.

—Alan Balazic, President, PMG.

PREMIER MACHINE & GEAR LTD.

159 McIntyre Dr., Kitchener, Ontario N2R 1G1

Premier Machine & Gear Ltd. occupies a modern 12,400 sq ft facility in Kitchener, Ontario.
